

PREHOSPITAL CRIME SCENE CARE

The **PCSC** Executor Course for health workers and volunteers is part of the training for emergency personnel, organized and promoted by NRC.

Course objectives

The aim of the course is to propose to the emergency operator a strategy of intervention at the crime scene, because more and more often he is called upon to intervene in scenarios where serious crimes have occurred. During the course, learners are provided with an adequate and correct methodology of approach to the crime scene, aimed at identifying situations at risk for rescuers, and then using a safe and effective method of event management.

The course focuses on the following training aspects:

- Acquire critical operational analysis skills in risk events.
- Acquire theoretical knowledge and updates on the identification of traces on the crime scene and forensic laboratory techniques.
- Acquire an operational methodology for a safe approach to the scene.
- Acquire theoretical knowledge and updates related to crime scene management methodology.
- Acquire theoretical knowledge and updates on the use of the identified tools to improve the safety of rescuers and effectively manage a crime scene.

Recipients of the course

Doctors, nurses, midwives, rescue drivers, rescuers, OSS, psychologists, social workers, lawyers, law enforcement, private investigators, students.

Instructors

The course was developed in collaboration with the State Police and is carried out by expert health personnel operating within the 118 Out-of-Hospital Emergency System.

Participant/instructor ratio

6:1

NRC Teaching Methodology

The course is structured in a theoretical part and a practical training part with small group interaction on real clinical cases and practical rescue simulations on scenarios where crimes have been committed.

Full course duration

8 hours

Time dedicated to theory

About 1 hour

Time spent practicing

About 6 hours

Duration of the retraining course

8 hours

Certification

Attending the course and passing the final assessment allow you to obtain an NRC certification valid for 24 months (2 years). It is mandatory to carry out an intermediate update at the end of the 12 months (1 year)

To renew the certification and maintain the skills and competencies, it is necessary to take a retraining course.

It is possible to access a retraining course within **3 months** from the expiry date of the entire course; this does not entail an extension of the initial validity, but simply facilitates the admission of learners to the retraining course, making the period that allows access to the course longer.

Passing the retraining course extends the validity of the certificate for another 24 months.

Opportunities for advancement in the training course

PCSC candidates, who have demonstrated that they possess practical skills, adequate theoretical knowledge and communicative-relational skills (criteria listed and specified in the "Potential Instructor Application Form") may be candidates as Prospective Instructors.

Important notice:

The LTC NRC secretariat is required to send each learner a WELCOME LETTER containing the credentials to access the reserved area and the code to purchase an original copy of the manual.
